Midnight Despatches.

Restoration of the Empire.

Gambetta's Proclamation.

LONDON, Feb. 1.—The "Times" says that the representation of France that Paris was already suffering greatly from want of food, the Emperor William ordered the military authorities to be sent from the German army to the French city. All trains converging upon Paris are forbidden to carry travellers, who are excluded from the city unless they are provided with a special pass from the German authorities, and these passes are allowed to leave Paris. The French authorities have requested the Prussians to prevent all admission to the city.

The Prussians are making colossal efforts to supply the city with breadstuffs, of which there is now on hand sufficient to last till October. The supplies of wheat will hold out until the 10th of February. Great quantities of food have been shipped from Belgium to Paris. New York, Feb. 1.—The "Times" London special of the 31st Jan. says—

It is confidently believed in court circles that the Empire will be restored with the Emperor as Regent. The Emperor's confidential aide arrived at Chislehurst to-day. Significant questions have been extended to Eugene by Queen Victoria.

BORDEAUX, Feb. 1.—Gambetta has issued a proclamation saying: "Gambetta's France believes the armistice with Germany to be a truce and the election of a chamber ready to conclude a shameful peace. It depends on France to upset this election. It is necessary to make the armistice a period for the instruction of our young troops, continue with sustained vigor the operations for defence and for war if necessary, while you initiate a National Republican Assembly willing to make such a peace only as is compatible with the honor, rank and integrity of France."

ASIA MINOR.

LONDON, Feb. 1.—A despatch from Constantinople says that the Asya Minor has been destroyed by a torrent and a large part of the towns was inundated. Many persons were drowned, but the precise number of victims is unknown.

THE CONFERENCE.

LONDON, Feb. 1.—A despatch from Constantinople says it is reported there that the London conference will not close its sessions until France has been represented in its Council. The conference will hold another meeting on Friday next week.

GREAT BRITAIN.

LONDON, Feb. 1.—The ravages of the smallpox are decreasing in London. Excessive frosts have endangered the crops of all kinds.

Morning Despatches.

Chanzy Accepts the Armistice.

French Elections on the 8th.

Who are Disqualified.

Bourbaki's Army, 80,000 Strong, in Switzerland.

New York, Feb. 1.—The "Times" special from Le Mans says: "The armistice was accepted, concluding at noon to-day."

PORTLAND, Feb. 1.—The steamer "Patriot" from Liverpool, has arrived.

BORDEAUX, Feb. 1.—The Government at Bordeaux has issued a decree ordering the French National Assembly to be held on the 8th. It disqualifies for election to the Assembly members of families residing in France since 1793, all persons who may have been in the service of the Emperor, and all persons who have held office in the Ministry of War, or held office as Ministers, Senators or members of the House under the Empire. The decree also provides that any person who has accepted office between the 2nd December, '91, and 4th September, '92.

Julius Simon has arrived here.

LONDON, Feb. 1.—An official despatch announces that Bourbaki's army of 80,000 strong, entered Switzerland to-day. The federal authorities have summoned the Cantons to disarm them.

Afternoon Despatches.

The Very Latest.

DESPATCHES TO 4 P. M.

BORDEAUX, Feb. 1.—It is reported here that Gen. Manoeuvre has refused to recognize the armistice, and demanding the protest of the French commander, has continued hostilities by which he forced the French army of the East to surrender or retreat into Switzerland.

Chasler who now commands the army of the East, concluded a convention with the Swiss authorities, and crosses into Switzerland with his whole army to-day.

Gen. Belloit covers the retreat.

There should be borne in mind that the armistice did not go into effect in the department of the east until Feb. 1st.

A quaker once hearing a person tell how much he felt for another, who was suffering and needed pecuniary assistance, dryly asked him, "Friend, has that felt in thy pocket for him?"

The proprietor of a forge, not remarkable for correctness of language, but who, by honest industry, had realized a comfortable independence, being called upon at a social meeting for a toast, gave—"Success to forgers!"

The London Correspondence proposes the following marriage-law for the lady readers, who occasion require: I will continue to love my husband so long as he is livable, honor him so long as he remains honorable, and obey him so long as his commands are just and reasonable.

There never was anything much more graphic than Josh Billings' brief item on New York, saying: "New York is a vast place. If a man pulls out on a phreatic procession, led by the beam, too, will strike a 240 gal, and leave him to take their dust."

The "Franklin"—Ogdenburgh is now in the hands of the selling point for the French. The French are now a good one, but the attempt to invade will only result in a series of disasters. The French are now a good one, but the attempt to invade will only result in a series of disasters.

Sole Agents, everywhere. The agent will be
in every city and town in the world. Put up
in all languages. Ask for Ready Relief.

New Principles of Medicine

[Vis. Reddy's Ready Relief, Regaining "Sarapanism" newness.]
 "Sarapanism" is a disease which is prepared on the same principles, and that is why they stop pain with the cure the most dangerous disease so rapidly, so little inconvenience to the patient. Some of the most famous in their advertisements, and nothing more than a simple remedy. The only one to be found in the U. S. and other dispensing their published formulas are copies taken from Pharmacopoeia, &c., hence, they claim some merit for their pills, pectorals, and sarapanism, similarly low but of imperfect merit, and worth nothing. When you see the name of the pills in the various medical writers from New York

remedial agents, progress in the science of would be a slow coach. Take, for instance, popular remedial agents of the day—Sarsaparilla, *squills*, forming the official compound; purgatives, of *aconite*, *jalap*, &c. Physicians, pharmacoputists, physicians, all, those of them these agents as uncertain, unreliable. *Natura Medica* is deficient of good, sterling medicines. The formulas of preparing the pills are based on wrong principles, and they claim to put up specific remedies, on the old

1.—Persons not grossly ignorant say they will lay (mean that they have laid (lain) on the hammer is laying (lying))

Why is coffee like an axe with a dull edge? Because it is not ground before it is used.

Why is it dangerous to take a nap while the cat is in action? Because the train runs over sleepers.

What is the most profitable of all business? To be in the right place at the right time.

Why is a list of useful compounds like a haystack? Because it is incomplete with out a handle.

"Why, what is your name?" "Robert is."

"Yes, but what is your other name?" "Bob."

"Ah! my dear fellow, said an old man to a friend, I am weak and broken down with age, I used to walk entirely around the park every day; but now I can only walk half way and back again."

A prudent man, advised has drunken servant to put by his money for a rainy day. In a few weeks his money asked him how much he had saved. "Faint, please at all," said he, "I raised twenty, and it all went."

The latest about Victor's best of Loto is that it makes them cry. Cullum went to the store with his check, and gave his check, and said, "You can see what effect it has on 'um," Mark Twain's map had the same effect on Brigham Young.

A New York politician, in writing a letter of condolence to the widow of a "country member" who had been killed in the war, wrote: "I am pained to hear that—has gone to heaven. We were bosom friends, but now we shall never meet again."

Sergeant Cullum, a very rough, blustering fellow, once got into a quarrel with a girl, and he gave, in a trial on the right of fishery he asked the witnesses, "Do you love fish?" "Ay," replied the witness with a grin, "but I don't like the Cullum sauce with it."

A Labor Union would not contain the mass of testimony which has accumulated in favor of Dr. Radway's Sarsaparilla. It is as safe, efficient and reliable remedy in curing coughs, colds, and pulmonary diseases. Many of the cure are truly wonderful.

"THIRD NATURE'S SWEET REVENGE," BARRY NICHOL—But there are times when this "Nature's Sweet Revenge" is a curse, when our minds and bodies have been so overworked, and we are worn out, and "Third Nature" comes in. The "Fountain of Youth" (on Iron Tonic), restores our strength and makes our rest sweet and refreshing.

ST. JOHN A. MACDONALD still continues to display his usual tact and energy in the editorial position. We once heard it remarked that his popularity would use day, but we know that when a man's advancement is the result of his own industry, his reputation is fixed and assured like that of the Great Pyramid. Remedy for rheumatism, diseases of the throat, lungs, &c. For sale by all druggists.

ALBION HOTEL,
MONTREAL, CANADA.

FOR TWENTY YEARS PAST THE FAVORITE RESORT OF THE MONTREAL BOATMEN.

It is centrally located on McGill Street, the great thoroughfare and commercial center of the city, commanding a magnificent view of the river St. Lawrence, the Victoria Bridge on the left, and a full view of Victoria Square and Mount Royal on the right.

The Hotel is furnished throughout in a superior manner, and everything arranged with a view to the comfort of guests. A number of the largest Hotels in the Dominion, having ample accommodation for 600 guests, while kept in first-class style the moderate sum of \$1.50 per day will be charged as hotel fare.

The traveling community will find it very convenient to be accommodated at the Albion Hotel when visiting Montreal.

**New Principles of Medicine**  
[Via: Radway's Ready Relief, Regum  
Sarsaparilla, Radway's.]  
Dr. Radway's Remedies are prepared on  
principles, and that is why they stop pain

Secure the most dangerous diseases so they are so little inconvenience to the patient. **S**cientific progress has been in their advertisements for nothing new in their medicaments that are all to be found in the U. S. and other countries. Their published formulas are copies taken from the Pharmacopoeia, hence, they claim merit for their pills, pectorals, and astringents, similarity to a lot of imperfect, inert, and impure. Were it not for the new principles in obtaining medicinal virtues from vegetable and mineral agents, progress in the science of medicine would be a slow coach. Take, for instance, the popular remedial agents of the day—

its adjuncts, forming the omelet of pompous purgatives, of aloes, jalap, &c. Physicians, pharmacopoeists, physiologists, all, more or less, these agents as uncertain, useless. Materia Medica is deficient of good, steady medicines. The formulas of preparing pills are based on wrong principles, and claim to put up specific remedies, on the rules prescribed, are contributory, nothing but a public *Kiddie's Ready Relief*. Science has no new medicines, repeated on new paper. *Print II* outstuck without delay or incost.

**W**ILL appear about five o'clock noon (Sundays excepted), furnished by Carriers at the rate of paid in advance, \$5 otherwise. More \$5 a year. \$3.50 for six months three months.

Arrangements have been made with CORRESPONDENTS in Madoc, Bridgmore, and other points, who will with early and full information re Gold Regions, and of matters interest.

Special attention will be paid to the proceedings of Courts of Law, County Public Meetings, &c., &c., and in such cases no expense will be spared to make the DAILY INTELLIGENCER worthy of its vantage ground.

**RATES OF ADVERTISING:**  
A liberal scale of prices for advertising has been arranged as follows:

containing 3 and 4 times the quantity of the Liniments, Paints, Killers, Panaceas and common fuses of alcohol as a base, and has been started to imitate Radway's Ready Relief. Some of these cheap imitations are sold by the barbers, in imitation of a highly rectified oil of Ammonia—used in the genuine—using the genuine Ready Relief will at once show the miserable fraud in the imitations. The Ready Relief has India Rubber Stoppers, a bottle inside each bottle.

Price of Radway's Ready Relief, per bottle, 35¢ each: Single Bottles, 25¢ each at Dr. Radway & Co.'s Principal Office, No. 151 Paul Street, Montreal, and by Druggists and storekeepers everywhere. One agent will be found in every city and town. Beware of cheap imitations. Ask for the

### New Principles of Medicine

[Via: *Kadway's Ready Relief*, Regulating  
*Sarsaparilla Resolvent*.]  
 Dr. Kadway's Remedies are prepared to new  
 principles, and that is why they stop pain so  
 quickly, and in dangerous diseases so rapidly,  
 and are so convenient to the patient, and  
 so important to his health and comfort.  
 It is also one of the new medicines—that the  
 world is all to be feared of the Dr. S. is the  
 one that has been found to be the most  
 Pharmacopoeia, &c., hence, they claim  
 support for their pills, pectorals, and sarsaparilla  
 similarly to a lot of imperfect, later, and worse  
 products. Were it not for the new principles  
 in obtaining the virtues from newly  
 remedial agents, progress in the science of

will appear about five o'clock

Arrangements have been made with K. CORRESPONDENTS in Madrid, Bridgetown, and other points, who will furnish early and full information respecting Gold Regions, and of matters of interest.

Special attention will be paid to reports of proceedings of Courts of Law, Corporate Meetings, &c., &c., and in short, pains not expense will be spared to make DAILY INTELLIGENCER worthy of publication.

**RATES OF ADVERTISING:**  
A liberal scale of prices for advertising has been arranged as follows:

Receipts.

Pamphlets.

Bonds and Mortgages.

Deeds.

Posters.

Placards.

## Silver Island

THE SILVER ISLAND IN LAKE SUPERIOR—  
HIGH RETURNS FOR MINING.

From the Detroit Post.  
It is but little over 30 years since the Upper Peninsula was given to Michigan as the equal of a dispute and a kind of "make weight." It was given to Michigan as a more "barter" an article of little value. Now we have become aware of the fact that there is not a more wonderful, a more beautiful, or a richer region within the National domain.

It has been found to contain ore of unequalled, and almost incredible, richness, producing in unexampled quantities, and in the one abundant and value found nowhere else. Last year, 1,000,000 tons of iron and more were exported from that region, and 20,000 tons of copper. To procure these metals more have been sunk one-third of a million into the earth. Silver has always been found, more or less mixed with the copper of those mines, and in quantities that, in countries where labor was cheaper would have made it a search a specialty. But here no attention is paid to enterprises except such as in other countries would appear to be fabulously remunerative. Lately, however, a silver mine yielding such rich indications as to force the attention of the most skeptical has been discovered on the north shore of Lake Superior.

Selling northwest and by north from Keweenaw Point for about 50 miles we reach a small town called Silver Island. The smaller island called "Packer Island." This strait passed, we passed a number of islands 25 miles and we are under Thunder Cape, a bold promontory at the east entrance of Thunder Bay, and in the British possession.

Two cups lowering in rugged granite 3,000 feet above the level of the lake, looks a fitting seat for the Olympian Jove might guard with his thunderbolts the entrance to the bay, or launch them at the daring intruder who should disturb the silver treasures at his feet.

Five miles northeast from the cape, and 2,000 feet from the main land is "Silver Island." It is of a rounded, irregular shape, about 75 feet in diameter, and rising not 100 feet above the level of the lake, when it is reached, and the waves in the bay. It is densely covered with vegetation, and the vegetation appears to be of quartz rock merely.

Between Silver Island and the mainland lies Barret Island, about half a mile in length and 400 feet in width, and clothed with trees and bushes. On this island a dock has been built.

Both islands and their submerged parts, or reefs, extend from northeast to southwest, the points opposite having rounded corners. Port William is made of Thunder Bay and 50 miles clear of the mainland. Arthur's Landing, where the Marquette Indians landed last summer, is five miles east of Port William, and the silver mining operations of Mr. Berk are 18 miles further still. Silver mining operations were commenced at Silver Island, last September. The shaft, or drift, is of course partly below the level of the lake, and is from 8 to 12 feet in diameter. Drifts and shafts had to be erected, and the heavy shaft that frequent storms send over the island as to keep out the water of the lake at their usual level. About 80 tons of ore have gone for sale to the smelting works in New Jersey, as the result of one week or two months' operations, and about 50 tons more are now ready for shipment. The ore smelted has yielded about \$1,700 currency per ton, whilst the richest mines of Mexico do not exceed \$850 per ton.

## American Despatches.

The Missing Steamer "Tennessee."

Statement of Secretary Robeson.

New York, Feb. 16.—The statement of Secretary Robeson regarding the "Tennessee" that it is too soon by ten days to expect regular advice from her, and that no extraordinary means of communication have been employed, goes much to allay public anxiety. Still there is considerable solicitude felt, especially by those who have friends on board.

## Afternoon Despatches.

The Very Latest.

DESPATCHES TO 41 P. M.

LONDON, Feb. 15, (telegraph).—The House of Commons to-night on motion of Mr. Gladstone, unanimously passed a docket of £20,000 to the Admiralty, and an annual allowance of £40,000. In the House of Commons this evening Mr. Gladstone declared that the Prussian had placed obstacles in the way of the restoration of peace. The Premier also said that the Government had suggested to Prussia to make known the proposed terms of peace.

VERMONT, Feb. 15.—The bankers of Paris are fully provided with the means to loan the two hundred million francs needed for the expense of the war contribution.

The French have proposed a prolongation of the armistice.

Paris is expected at Versailles.

The Emperor will go to Berlin at the beginning of March to open the session of the Reichstag.

BREMEN.—The Bremen Chamber of Commerce has rendered it general order that the Bremen Chamber of Commerce should be suspended by its own action.

Narrative of the Red River

(From Blackwood for January.)

CONTINUED.

As stated in our previous article, the Ottawa authorities have announced that the road from Thunder Bay to Sheboadwan Lake would be fit for traffic before the end of May; whereas by that date not more than thirty miles were still uncut through the primeval forest. A rumor got abroad amongst the regular troops that the Canadian authorities were not very anxious to hasten the operation, lest by so doing they might make it possible for the regulars to get back before the winter set in; and every one knew that the Dominion

The construction of this road was under the superintendence of the Public Works Department, the gentleman representing which in the Ministry was a French Canadian, and known to be heart and soul in

the priestly party in Quebec, and therefore most favourably inclined to Riel. Men of suspicious turn of mind began to say that the fact of their being no road ready for advance was part and parcel of a political scheme whereby the departure of the expedition might be stopped altogether. Fortunately those who had charge of its management were not men to be turned from their plans by any ordinary difficulties; as the promised road was not likely to be ready in time, another route to Shes-

A large sized river flows out of the north and being joined by two others of considerable magnitude, empties itself into Thunder Bay; it is known for the greater part of its course as the Kaministiquia River. The difference of level between Shebandowen Lake and Thunder Bay is more than 100 feet, and in descending from that great height the water passes over some very fine falls, one of which is about 120 feet high, being one of the most picturesque spots in British North America.

years exploring, surveying, and road making in that district, had impressed upon the military authorities, when the plans for operations for the Expedition were decided upon, that this river could no more be made of owing to the dangerous nature of its rapids and the magnitude of its volume. However when it was found that the expedition could not possibly be ready in time to start, the commanding officer, Major Captain Young, 60th Rifles, was sent up the river to ascertain the practicability of using it for the conveyance of boats and stores. The weather was most unpropitious, it poured continuously; the men were suffering, having constantly to work up to their waists in water; the labor was extremely

but the perseverance of the above-mentioned officer, capable of overcoming any difficulties, was duly rewarded. This discovery was a happy event, as it rendered independent of the road.

As numerous portages have to be made over before we land the reader in the province of Manitoba, it is perhaps better to describe here the mode of crossing the work of all being alike in character, only varying in amount according to distance to be traversed and the nature of the intervening ground. The bulk of the articles taken with us were the barrels which were all about 80 feet long, made in proportion. They were loaded with keels, and in form were very

like them used in our navy. Each carried eight or nine soldiers, and two or three Indians, or civilians, who had especially engaged as skilled in maneuvering boats in rapid water. The stores consisted of salt pork, beans, preserved meat, flour, biscuit, pepper, salt, and sugar. The heaviest of the articles was salt pork, which was packed in small barrels weighing 300 lbs each, the others being in much lighter and much handier packages. Besides food, there was ammunition, trenching tools, camp equipment, cooking utensils, waterproof sheets, blankets, &c.; and with the artillery, two pound bronze guns, and their ammunition, and

The boats were distributed into brigades of six, to each of which a company was assigned. With each brigade were boatmen's tools, and all sort of stuff for the residence: spare axes, sails, &c., &c. On starting, it was known that we should have to rely on ourselves and the stores we took with us; for such was the utter barrenness of the wilderness through which we were about to penetrate, that nothing but wood, stones and water were to be had there.

Every probable, indeed almost every possible, contingency had to be thought of and provided for; and it may be confidently asserted that no expedition has ever started more thoroughly complete or better prepared for its work.

The brigades of boats were to move singly or in groups of two or three, according to circumstances; but three was the largest number that could work together on a portage, two being the best. When one of these detachments reached a portage—which it generally did before the others—its boats were beached, and the stores, &c., over, and had again started—the boats were at once drawn into shore as close as possible and unloaded, the stores belonging to each boat being put in a separate pile. These were covered with

## New Principles of Medicine

[Via: **Radway's Ready Relief**, *Regulating Sore-Throat Powders*.]

Dr. Radway's Remedies are prepared on entirely new principles and that is why they *act pain* so quickly on the most dangerous diseases so rapidly, and in little inconvenience to the patient. *But* the advertisement boast in their advertisements, "that there is nothing new in their medicaments—that the age-old principles of medicine are followed." *But* the age-old principles are all so far from the U. S. and other countries, that they are not even known in the United States. *But* the age-old principles are all so far from the U. S. and other countries, that they are not even known in the United States. *But* the age-old principles are all so far from the U. S. and other countries, that they are not even known in the United States.

merit than their pils, pectorals, and asarapilae, similarly to a lot of imperfect, inert, and worthless remedies. Were it not for the new principles and the new methods of treatment from the remedial agents, progress in the science of medicine would be a slow coach. Take, for instance, the popular remedial agents of the day—Sarsaparilla its adjuncts, forming the official compound, and the various substitutes, such as the various phosphates, arsenicals, pyrophosphates, etc., none of them these agents as uncertain, unreliable, and Materia Medica is deficient of good, sterling, medicines. The formulas of preparing Sarsaparilla based on the old principles and the claim to put up specific remedies, on the old rules prescribed, are contributing nothing of value to the public. *Kidney's Ready Relief, Sarsaparilla*

## The Daily Intelligence

WILL appear about five o'clock every afternoon (Sundays excepted), and be furnished by Carriers at the rate of \$5 a copy, paid in advance, \$6 otherwise. Mail subscribers \$5 a year, \$3.50 for six months; \$3 for three months.

Arrangements have been made with the CORRESPONDENTS in Madrid, Bridgeport, Worcester, and other points, who will furnish daily and full information respecting the War, Politics, and of matters of

Special attention will be paid to reports  
proceedings of Courts of Law, Corpora-  
Public Meetings, &c., &c., and in short,  
pains no expense will be spared to make  
DAILY INTELLIGENCER worthy of publi-  
courage.

**RATES OF ADVERTISING:**

A liberal scale of prices for advertise-  
ments arranged as follows:

English and Scotch Quarterlies.

AND

Blackwood's Magazine.

REPRINTED IN NEW YORK BY

The Leonard Scott Publishing Co.

QUARTERLY.

THE EDINBURGH REVIEW.

NORTH BRITISH REVIEW.

LONDON QUARTERLY REVIEW.

WESTMINSTER REVIEW.

MONTHLY.

Blackwood's Edinburgh Magazine.

THESE periodicals are the medium through

which the greatest minds of our time

communicate with the public. They are

not only the most valuable, but also the

most interesting and useful of the world.

History, Biography, Science, Fiction, Art, Religion, the great political questions

of the past and of today, are treated in their

pages as the learned alone can treat them. No

one who would keep pace with the time can

do so without these periodicals.

Of all the most valuable libraries in the

world, none are so complete as those which

contain a copy of each of these periodicals.

For one of the Review, \$5.00 per annum.

For one of the Edinburgh, \$5.00 per annum.

For one of the London, \$5.00 per annum.

For one of the Westminster, \$5.00 per annum.

2-10-12-14-16-18-20-22-24-26-28-30-32-34-36-38-40-42-44-46-48-50-52-54-56-58-60-62-64-66-68-70-72-74-76-78-80-82-84-86-88-90-92-94-96-98-100-102-104-106-108-110-112-114-116-118-120-122-124-126-128-130-132-134-136-138-140-142-144-146-148-150-152-154-156-158-160-162-164-166-168-170-172-174-176-178-180-182-184-186-188-190-192-194-196-198-200-202-204-206-208-210-212-214-216-218-220-222-224-226-228-230-232-234-236-238-240-242-244-246-248-250-252-254-256-258-260-262-264-266-268-270-272-274-276-278-280-282-284-286-288-290-292-294-296-298-300-302-304-306-308-310-312-314-316-318-320-322-324-326-328-330-332-334-336-338-340-342-344-346-348-350-352-354-356-358-360-362-364-366-368-370-372-374-376-378-380-382-384-386-388-390-392-394-396-398-400-402-404-406-408-410-412-414-416-418-420-422-424-426-428-430-432-434-436-438-440-442-444-446-448-450-452-454-456-458-460-462-464-466-468-470-472-474-476-478-480-482-484-486-488-490-492-494-496-498-500-502-504-506-508-510-512-514-516-518-520-522-524-526-528-530-532-534-536-538-540-542-544-546-548-550-552-554-556-558-560-562-564-566-568-570-572-574-576-578-580-582-584-586-588-590-592-594-596-598-600-602-604-606-608-610-612-614-616-618-620-622-624-626-628-630-632-634-636-638-640-642-644-646-648-650-652-654-656-658-660-662-664-666-668-670-672-674-676-678-680-682-684-686-688-690-692-694-696-698-700-702-704-706-708-710-712-714-716-718-720-722-724-726-728-730-732-734-736-738-740-742-744-746-748-750-752-754-756-758-760-762-764-766-768-770-772-774-776-778-780-782-784-786-788-790-792-794-796-798-800-802-804-806-808-810-812-814-816-818-820-822-824-826-828-830-832-834-836-838-840-842-844-846-848-850-852-854-856-858-860-862-864-866-868-870-872-874-876-878-880-882-884-886-888-890-892-894-896-898-900-902-904-906-908-910-912-914-916-918-920-922-924-926-928-930-932-934-936-938-940-942-944-946-948-950-952-954-956-958-960-962-964-966-968-970-972-974-976-978-980-982-984-986-988-990-992-994-996-998-1000-1002-1004-1006-1008-1010-1012-1014-1016-1018-1020-1022-1024-1026-1028-1030-1032-1034-1036-1038-1040-1042-1044-1046-1048-1050-1052-1054-1056-1058-1060-1062-1064-1066-1068-1070-1072-1074-1076-1078-1080-1082-1084-1086-1088-1090-1092-1094-1096-1098-1100-1102-1104-1106-1108-1110-1112-1114-1116-1118-1120-1122-1124-1126-1128-1130-1132-1134-1136-1138-1140-1142-1144-1146-1148-1150-1152-1154-1156-1158-1160-1162-1164-1166-1168-1170-1172-1174-1176-1178-1180-1182-1184-1186-1188-1190-1192-1194-1196-1198-1200-1202-1204-1206-1208-1210-1212-1214-1216-1218-1220-1222-1224-1226-1228-1230-1232-1234-1236-1238-1240-1242-1244-1246-1248-1250-1252-1254-1256-1258-1260-1262-1264-1266-1268-1270-1272-1274-1276-1278-1280-1282-1284-1286-1288-1290-1292-1294-1296-1298-1300-1302-1304-1306-1308-1310-1312-1314-1316-1318-1320-1322-1324-1326-1328-1330-1332-1334-1336-1338-1340-1342-1344-1346-1348-1350-1352-1354-1356-1358-1360-1362-1364-1366-1368-1370-1372-1374-1376-1378-1380-1382-1384-1386-1388-1390-1392-1394-1396-1398-1400-1402-1404-1406-1408-1410-1412-1414-1416-1418-1420-1422-1424-1426-1428-1430-1432-1434-1436-1438-1440-1442-1444-1446-1448-1450-1452-1454-1456-1458-1460-1462-1464-1466-1468-1470-1472-1474-1476-1478-1480-1482-1484-1486-1488-1490-1492-1494-1496-1498-1500-1502-1504-1506-1508-1510-1512-1514-1516-1518-1520-1522-1524-1526-1528-1530-1532-1534-1536-1538-1540-1542-1544-1546-1548-1550-1552-1554-1556-1558-1560-1562-1564-1566-1568-1570-1572-1574-1576-1578-1580-1582-1584-1586-1588-1590-1592-1594-1596-1598-1600-1602-1604-1606-1608-1610-1612-1614-1616-1618-1620-1622-1624-1626-1628-1630-1632-1634-1636-1638-1640-1642-1644-1646-1648-1650-1652-1654-1656-1658-1660-1662-1664-1666-1668-1670-1672-1674-1676-1678-1680-1682-1684-1686-1688-1690-1692-1694-1696-1698-1700-1702-1704-1706-1708-1710-1712-1714-1716-1718-1720-1722-1724-1726-1728-1730-1732-1734-1736-1738-1740-1742-1744-1746-1748-1750-1752-1754-1756-1758-1760-1762-1764-1766-1768-1770-1772-1774-1776-1778-1780-1782-1784-1786-1788-1790-1792-1794-1796-1798-1800-1802-1804-1806-1808-1810-1812-1814-1816-1818-1820-1822-1824-1826-1828-1830-1832-1834-1836-1838-1840-1842-1844-1846-1848-1850-1852-1854-1856-1858-1860-1862-1864-1866-1868-1870-1872-1874-1876-1878-1880-1882-1884-1886-1888-1890-1892-1894-1896-1898-1900-1902-1904-1906-1908-1910-1912-1914-1916-1918-1920-1922-1924-1926-1928-1930-1932-1934-1936-1938-1940-1942-1944-1946-1948-1950-1952-1954-1956-1958-1960-1962-1964-1966-1968-1970-1972-1974-1976-1978-1980-1982-1984-1986-1988-1990-1992-1994-1

shop named on his card, and if a double quantity be surreptitiously obtained, the law will take its course. The bakeries also distribute the rice, and the officers exist, upon night duty, to bear any complaints on the receipt of food. The Government allows a bounty of five cents for every hundred weight of rice in addition to the price, but no further from a hiding place, and an Italian baker supplements the bounty by 30. Much food has thus been brought to light. The supply of rice is becoming so scarce that food for two months ago—about two ounces per week is allowed to each individual, and families club their rations to make the most of it in proportion to the water, as Falcia's half-pennyworth of bread is his sack.

A few luxuries can be had, and here is the current price of such on the 21st inst. 12 1/2 lbs. of the best rice—1 cent, 13 lbs.; small tinned, 10; a box, 4 francs; loaf of celery 3 fr.; potatoes are not to be had; cauliflower, 5 fr.; a good head of cabbage, 6 fr.; ditto (small) 3 fr.; a pound of leaves of dill, formerly thrown into the dust-bin, 13 cents; mushrooms per lb. 25 fr.; bacon per lb. 5 fr.; butter, 40 fr.; eggs, 1 fr.; chocolate per lb. 3 fr.; coffee and sugar, one-half franc in price; a turkey, 135 fr.; a goose, 60 fr.; a chicken, 35 fr.; a rabbit, 25 fr.; a duck, 30 fr.; a crow, 3 fr.; railway grass "made palatable," 3 fr. per lb.; ditto for oil, made up from purified chickens, lamp oil, here for 3 fr. per lb.; a squirrel, 5 fr.; half of a fat dog, 6 fr.; rats hawked about by those who catch them fetch 3 fr. the half dozen; sea-mot is no longer obtainable; cats have disappeared, the inmates of the Zoo. Gardens devoted, the hippopotamus excepted, and spared only in the belief that his flesh could not be softened by any amount of pounding, stepping in vinegar and boiling in brandy, was the case with the poor elephants. One of the clubs has suggested that a slice be taken off the buttocks of the hippopotamus, as the Abyssinians, according to the natives, do their live ones, and progress be reported accordingly. For a population compelled to do nothing against his will, it is tantamounting to witness the huge mountain of flesh unapplied. The return of the cold weather has led to more cutting down of the trees of the boulevard, some of which are also required for charcoal for gunpowder. The steam-mills are only working half-time, and the flouration produces few casks. The employment of the asphalt of the streets for fuel has not succeeded; but some poor people gather it and obtain warmth even from its smoke. Firewood costs 800 fr. the ton.

After searching the occupied houses for any stock of food, the police have been despatched to have taken in hand. A judge de police, a police officer, and an expert, visit every empty apartment, appropriate in the name of the common wealth, provisions, grain, bedding and wearing apparel, and issue a government bond for the amount, a list of goods taken, and sealing up the door. Possession is taken after the same fashion of unoccupied premises in the quarters of the city free from the police, and the police officers have been despatched to shelter those who have fled to the danger.

Up to the 20th, 90 persons have been killed and 510 wounded by the bombardment. Over two-thirds are children and women. The Italian cannon, but the citizens show no fear; their hatred against the besiegers increases, their resolve to hold out becomes more decided. A letter might be filled with the sad details of burning fields of children blown to atoms, and mothers and infants at their breasts killed, the bed-ridden stricken hospitals have been fired into and patients mangled, hospices for the aged and infirm, asylums for idiots and madmen, have been completely annihilated. People who must remain in the exposed districts—half a million of the inhabitants of such have already changed—cautiously along under shelter of walls as if they were escaping from a plague. The bombs have fallen most in the neighborhood of the Pantheon, where the Colleges and Seminars are situated. In one case a shell dropped into a lecture hall while a Professor was occupied with his class. It burst, no one is injured, and the lesson proceeds. Dandolo, the famous general, who is largely occupied on the commission for the defense of the city, all chemical aid, is needed in his study, a bomb enters, rolls under a table and remains there. The celebrated Abbé Moigno, leaves his library for a few moments to point a letter; on his return he discovers his furniture smashed and his valuable books burning from a shell. Another fall in the chemical laboratory of the College Rollin, and would have been serious only the chemicals had been previously removed. The dome of the Pantheon was occupied with a bomb—it will only add to its glory the more. The Battalion of the Medical School, where has been torn up by the bomb—the Jardin des Plantes has had its admired green-house destroyed, its invaluable collection of exotic plants ruined. Only two camels escaped, and these have been presented to Mr. Richard Wallace, who inherited the late Lord Hertford's personal property, and who has organized himself by his princely donations to the poor English in Paris as well as to every charity in the city. Wallace, the Municipal Council a boulevard benefactor by his name. His bounty has never been strained. The capital is a long way yet from being destroyed; the Krupp cannon may not be forced to surrender, and the city of such, if the word can be applied, is likely to be given to General Famine.

The sickness in the capital is increasing, there are now four times the number of deaths weekly, than in the piping times of peace—the figure last week, was as high as 4,291. Babies under six months old suffer the greatest mortality; the 3,200 milk cows, anxiously preserved for them, yield but a scanty supply of milk, and the sick animals are kept constantly on the move, to escape the shells.

The balloons bring the anxiously expected letters from Paris with great regularity; and several companies have been formed to bring back the news, but the balloons are shot down.

The balloons bring the anxiously expected letters from Paris with great regularity; and several companies have been formed to bring back the news, but the balloons are shot down.

The citizens are united to not increase the enemy's hands by giving them any part, they have ceased to affect any situation, or rather "bells of harmony," where people crowd together to secure warmth—Trochu has been considered the command of the city proper, offensive operations will be confined to another, who cannot surprise Trochu, in working operations he may lead the better spirit, the regular to dash themselves against the German ring with the same results. Trochu ought to be happy in the thought, that times are changed since the Chateauxs crowded their unlovely generals.

The circle around Paris is daily "colder," the forts were determined not to yield to anything but a better party, where the few to be better grappled with. The Trochu may raise fire and iron, but the force grows away as they please, they have no civil population to shelter—his occupants are but soldiers and sailors, whose duty is to die. Bellicose as undoubtedly is the defenders of Paris, it is felt that they cannot escape the enemy's fire—betting on the city to do with the siege. The city is the only one of the besieged have tried to break away, and failed. Their last attempt and greatest effort at Mont Valerien, was an ultimate bloody success. Provoit, it is felt that the National Guard will be the flag of patriotism in their ranks. The flag of patriotism in their ranks. The flag of patriotism in their ranks.

## Daily Intelligence.

WEDNESDAY, FEB. 16.

Social.—Another of those pleasant socials will be given by the young ladies of the congregation at the M. E. Church tonight. Readings and refreshments.

Fun.—A considerable fire is at present being done in fish, the price of our own inland water. The price paid is \$4.50 per 100 lbs., at which rate, a good deal of the article is purchased for exportation to the United States market.

THEATICAL.—We are requested to state that the Belleville Dramatic Club, who have already performed twice this season, will shortly make their third appearance. They have now in rehearsal two standard plays, which will, we have no doubt, be produced in first class style.

THE WEATHER.—The thaw continues, and promises to be very speedy, to put an end to sleighing within a few days. This would indeed be a calamity to business men, a great deal of wood and other heavy articles already contracted for, rendering to be brought in. There are also fears entertained for the safety of the fall wheat, which is but thinly covered, and which would suffer from the frost should the snow melt and disappear. Provisions on the streets seem to be the only persons who enjoy the present condition of the atmosphere.

TROTTERING RACE.—The Kingston News says: The trotting match on the ice on Wednesday afternoon between Butcher's Maid of Belleville, and Gray Hawk of Plover, resulted in favor of the latter. Butcher's Maid took the first heat; the second was a dead heat, and third, fourth and last heats were taken by Gray Hawk. The winning horse is a very handsome gray stallion, and last year Mr. J. A. Allen, of Plover, is fairly proud of him. Mr. Allen exhibited the horse at the County Agricultural Fair, Jefferson County, New York, and received the first prize for the best road stallion, a very handsome gold medal.

## Dominion Parliament.

Ottawa, Feb. 17. In the House of Commons yesterday, Mr. Mackenzie made inquiry respecting the representation of Manitoba in Parliament, advertising to the point raised at the last session by Mr. Miles to the Manitoba Bill for the representation of the new Province in the Council of the Dominion. He now wished to know what had been done by the Government.

Mr. Sir John A. Macdonald acknowledged the force of Mr. Miles' argument, and said the question had been under serious consideration. The necessary steps had been taken for holding elections in Manitoba, and returns were daily expected. There would consequently be representation in the House of Commons and in the Senate, by consent of the Opposition, and the proper steps would be taken to secure the constitutional of legislation by a confirmatory Bill which would be submitted to the Imperial Government.

The address in reply to the speech from the Throne was moved by Dr. Lacoste, who praised the Government and said the hope that Mr. Kirkpatrick, who expressed the hope that the volunteers in Manitoba would receive grants of land, and that the joint High Commissioner would be sent to inspect the land strongly on the ministry, that at the conclusion of and on the satisfactory treatment of the pending American dispute, Canada will send an ally of Great Britain, and further the name of the number for Kingston is used as indicative of the first officer who the new ally will be on her voyage.

## The Montreal and Fields.

The Montreal success which has marked the operations of Dr. Williams on let in the 10th concession of Montreal, has given new importance to the gold region of North America. As soon as the gold settlement showed the prospect of him as it had been of many others, the gold would pull up stakes and abandon the mines to their fate. But in this case the prospect was not only established, but the future of the gold fields of Montana, on the plateau, patient, persevering, it has proved his confidence by the best of all evidence, success. The last report of the previous mine found is situated about five miles from Montreal and about eight from Montpelier. The mine is some eighty rods from the river Montpelier, and is a real and respectable sized stream. The shaft is some sixty feet in depth, with a drift at an angle of about 45 degrees of fifty feet, containing a well-defined vein of quartz. At a depth of fifty to sixty feet, from repeated experiments, the rock proves to be of a much richer quality than that of the surface, and at the last clearing up has clearly ascertained. In some of the rock is plainly visible, but twice found in this state does not present that rich appearance which distinguished the specimens from the Hutchinson mine. It is mixed with considerable sulphur, and it is here the miner finds his greatest difficulty. As a matter of fact, the rock may produce at the rate of \$50 to \$60 of gold per ton, but reducing the same description of rock by the crusher will only yield perhaps at the rate of \$3 to \$10 per ton. It is very evident the gold is not all taken out of the rock by the present means of crushing, but great improvements have been made by Dr. Williams, and he confidently anticipates from recent experiments to perfect a process by which a much larger quantity of gold will be saved.

The crusher is located a few steps from the bank of the Montpelier, is a compactly put together and conveniently situated. It has been in operation since October, 1869, and has been continually running since that period on rock which averaged from \$5 to \$15 per ton. There is a single barrel of five stamps in operation at present, with a capacity of crushing 25 tons a week. A new battery is to be put up in the mill this winter, which the Patentes guarantees will be in operation in 24 hours. It is felt that the gold is widely distributed over that section of Montana, we may mention the fact that at Dr. Williams' crusher, several lots of rocks from different places in Montana have been put through the mill, and in each case it was found, good paying material. The last clearing up of the Dr. Williams' mine, noticed a day or two ago, shows an average yield of about \$11 per ton. It also has been put through the mill, and experiments have been made with the concentrated tailings, a large quantity of which is on hand, which shows a very profitable result. Dr. Williams' mill can also produce a great amount of ore for the energy and pick they have displayed, and we shall record their continued success with great satisfaction.

Police Court. (Before A. Diamond, Police Magistrate.) FRIDAY, FEB. 17. ARRAULT. Joseph Brice charged Albert McDonald with committing an assault upon him. Defendant admitted the charge, and was fined \$5 and costs or 30 days in goal with hard labor in default. The money was paid.

LARCENY. Joseph Brice was charged with stealing two hammers, two wrenches, one collar block and one screw driver, the property of W. H. Vermilyea. Prisoner pleaded "not guilty," and consented to be tried summarily under the Recorder's Act.

Chief of Police Petrie was sworn and said he executed a search warrant on the premises where prisoner resided, and found the large hammer in the room, and he said he had a wrench, and gave it up, but denied having the other articles. Found them in another room, between two beds. He said he had them in overtime, and that Mr. Vermilyea had charged him the value of the steel from which the three articles were made.

Thomas Wilson was sworn and said he had used the screwdriver before Brice was charged in Vermilyea's; the small hammer was made prisoner, and claimed by him; was told he also made the small hammer, which he also claimed; he made the wrench and claimed it as his; the value of the articles was about \$75; he made them all in his master's time; it was used for apprentices, about a period when their time expired, to make such articles and carry them away. Mr. Vermilyea allowed this to be done in overtime, and the other said he had used the wrench in overtime, and that Mr. Vermilyea had charged him the value of the steel from which the three articles were made.

Thomas Wilson was sworn and said he had used the screwdriver before Brice was charged in Vermilyea's; the small hammer was made prisoner, and claimed by him; was told he also made the small hammer, which he also claimed; he made the wrench and claimed it as his; the value of the articles was about \$75; he made them all in his master's time; it was used for apprentices, about a period when their time expired, to make such articles and carry them away. Mr. Vermilyea allowed this to be done in overtime, and the other said he had used the wrench in overtime, and that Mr. Vermilyea had charged him the value of the steel from which the three articles were made.

Alexander Beattie, sworn—After Brice was left, one night as a person he supposed to be the prisoner, working at the fire in Vermilyea's shop; the next day or day after, missed the other black and one of the wrenches. Some further evidence, corroborative of the above, was heard, and further hearing was adjourned until 3 o'clock, p. m.

At three o'clock the examination was resumed. Harriet Barlow, who lives where prisoner boards, was sworn, and said she had the tools between the arms when she heard the officers in the morning; she had no conversation with Brice or any one else respecting them; put them there for her own motion.

The concluded the evidence, and the Magistrate, in pronouncing judgment, said he would find the prisoner guilty of stealing the screw driver; the other articles were evidently made by him. He would therefore send prisoner to goal for three days with hard labor.

The Boston Post recommends that the city manufacture its own gas. In its corporate capacity, it pays \$100,000 per year for the gas it consumes. By manufacturing its own gas, it would save one mill.

The Boston Daily Company charges \$8 per thousand for the right, while the city should straighten at two or three of its large public institutions, that it can manufacture a pure and good article of gas at a cost of \$1.25 per thousand feet.

A recently married lady lately consulted her lawyer on the following question: "As I married Mr. Smith for his wealth, and that wealth is now spent, am I not to all intents and purposes a widow, and at liberty to marry again?" It appears from a pamphlet just issued by the financial agents, that the earnings of the Central Pacific Railroad, since the inclusion was put into operation, were over \$18,000,000 and that of this sum, \$10,000,000 were net earnings over expenses of operating the road. When these expenses had all been paid, and the interest on the bonded debt, there was still a surplus of \$8,000,000.

The last report of the previous mine found is situated about five miles from Montreal and about eight from Montpelier. The mine is some eighty rods from the river Montpelier, and is a real and respectable sized stream. The shaft is some sixty feet in depth, with a drift at an angle of about 45 degrees of fifty feet, containing a well-defined vein of quartz. At a depth of fifty to sixty feet, from repeated experiments, the rock proves to be of a much richer quality than that of the surface, and at the last clearing up has clearly ascertained. In some of the rock is plainly visible, but twice found in this state does not present that rich appearance which distinguished the specimens from the Hutchinson mine. It is mixed with considerable sulphur, and it is here the miner finds his greatest difficulty. As a matter of fact, the rock may produce at the rate of \$50 to \$60 of gold per ton, but reducing the same description of rock by the crusher will only yield perhaps at the rate of \$3 to \$10 per ton. It is very evident the gold is not all taken out of the rock by the present means of crushing, but great improvements have been made by Dr. Williams, and he confidently anticipates from recent experiments to perfect a process by which a much larger quantity of gold will be saved.

THE Hastings Sabbath School Association will hold their Second Convention on Tuesday and Wednesday, 21st and 22nd of February, 1871. Day Session in the Congregational Church, Evening Session in the Methodist Episcopal Church. Sections 9 a. m., 3 p. m., and 7:30 p. m. Collections to be taken up during the Evening Session. DR. PALMER will conduct the service of song. A. F. WOOD, President. C. MARTIN, Secretary. February 17th, 1871.

## CONCENTRATED LYE.

A MONUMENT to the many

benefits of this concentrated

article is one by a

Douglas, in Montreal, for

which he has borrowed the

name Extract of Soap—and

by the way, perhaps he can

enlighten us as to what

kind of Soap he means. With this individual,

whose ideas of Soap and Trum are

entirely new, the long of

largely developed, that he has

tried the concentrated

article, and the result is

that he has been

convinced that it is the

best article of the kind

that he has ever used.

This is a fact of great

importance, and one which

will be of great service

to the many who are

in the habit of using

the concentrated

article.

**New Principles of Medicine**  
 [Via: **Rayway's Ready Relief, Regulating**  
**Satsepurinan Mitalvani.**]

Dr. Radway's Remedies are prepared on scientific principles, and that is why they stop pain so quickly. Most cases of headache, toothache, neuralgia, etc., are so little inconvenient to the patient. Some "remedies" however lock in their advertisements, in nothing new in their modicum;—that the ingredients are to be found in the kitchen. The ingredients of their finished formulas are copied verbatim from *Pharmacopoeia*, &c. hence, they claim expert merit for their pills, powders, and ointments, similarity to a lot of impotent, inert, and worthless stuff.

Ward's Remedies are the only ones in the world in obtaining remedial virtues from newly discovered remedies, progress in the science of medicine would be a new touch. Take, for instance, the popular remedial agents of the day—Sarsaparilla, Blood Purifier, etc.,—these are the same old ingredients, of which the *U. S. Pharmacopoeia*

pharmacopoeists, physicians, all, more or less, deem these agents as uncertain, unsafe, etc. Materia Medica is deficient of good, reliable, medicines. The formulas of preparing the pills are based on wrong principles, and the claims to put up specific remedies, on the old claims prescribed, are contributing nothing of value to the public. *Keeney's Ready Relief, Symplocaria* has been more widely recognized, as having

No. 249

Speech of Hon. B. Head in  
England.

Norfolk, from the *Norfolk Chronicle* of 28th January:

debaters in Parliament introduced a similar resolution, but it met a like fate. The member could not be heard—because

was well known that 'independent nationality' in reality meant 'annexation to the United States.' (Hear, hear.) He thought this fact showed what was the feeling not only of the members of the Canadian Parliament, but of the people whom they represented. (Applause.) At this point another very important subject was coming to the attention not only of the Canadian but the British Parliament.

the latter having just sent out some missioner with regard to it—he went to the Fisheries question in connection with Canada and the United States. It will be as well to give them some little information of that question. In 1818 a treaty was framed with the United States, defining the rights of each country with regard to their respective fisheries, and the United States declared and agreed to "a boundary beyond which they were not to fish."

...the fisheries of British America came of such vast importance that the people of the United States from time kept encroaching upon them. Remedies were made, and at length an agreement was entered into by which America and the United States should interchange certain commodities free of duty—the products of the land, sea, for

the mine—the United States, for the  
valent, receiving the privilege of fish-  
certain waters, with the free naviga-  
the St. Lawrence and the use of the  
dian canals, at the same rate of charge  
that of the merchant vessels of  
America. This treaty was to extend  
a period of ten years, either party ha-  
power at the expiration of that term  
giving a year's notice, to put an end

In 1864 or '65 the United States government required notice, and so this treaty terminated. Of course, as America was deprived of the advantage accruing from the treaty she had to refuse to the United States the continuance of the privileges given in regard to the fisheries. (Hear, Consequently the Canadian Government with the sanction of the British Government

ment, but a slight duty on the A  
vessels, which was paid for the fir  
In the meantime every means were  
on the part of Canada to bring to  
cessful issue, very liberal terms being  
ed for the purpose, certain negotiat  
a new treaty with the United States  
the United States made such illiberal  
that it was not possible to accept  
that at the present time there was  
to be made with the United States

mercantile treaty with the United States, an impost duty of twenty per cent was charged upon all Canadian exports of products. Although this impost was regarded in Canada as a great detriment to their commerce, it had proved of advantage to them, because, being British in origin, it had taught them a spirit of self-reliance. Finally, the Canadian Government felt that the United States would not allow to fish in those bays and

tations which belonged to Canada which were most profitable fisheries, the extent of which it was difficult to comprehend in this country. Of course, an American liked to get everything he could by whatever means, whether by fair or by foul means, no bluster he was trying to get those privileges from Great Britain; but how, speaker had yet to learn the desire to obtain possession of a

constituted a right to it. (Hear.)  
da could obtain from the United S  
reasonable trade policy, the dispute  
easily be settled—(hear hear)—a  
cautioned England as to how she des  
a fourth-rate maritime power such  
America. (Hear, hear.) Accord  
statistics in maritime position, E  
stood first; Franco second; the  
States third; and British America  
He warned this country to guard ag

union of third and fourth powers trusted that would never be, and he believe it would without it was forced Canada. And as to our general policy, he reminded us that if a tree lopped of its branches it would possibly die. (Cheers.) Canada and received no material aid from country. It was true we sent to Governor-General, and they paid

Narrative of the Red River

WORK.

PART II.

(From Blackwood for January)

CONTINUED.

The second section ends where the road crosses the Matawan by a bridge about 100 yards in length, constructed like the previous one during the preceding winter. The distance between the two bridges is about five miles, the road running through

As the road descends into the valley the Mistawin and enters the third section the character of the soil and scenery changes—the red clay is left behind, one enters a rolling country of rich loam, with sandy soil rises here and there thickly wooded over. Two unfettered streams, one of 24, the other of about 100, flow into the river.

The road is much more level in section than in the other two; but at places the natural drainage is so bad even up to the date when the force finally embarked at Suchbandawar, that a track cut through the forest was used

already detailed, that the river could be made available, particularly along the third section, for the transport of boats and stores, we should have been delayed a month or six weeks still more than we were, and could not possibly have reached Fort Garry in time to have secured barrack accommodation for the winter before the winter set in, or to have turned them back before the frost had closed the rivers and small lakes to be passed at higher portions of the route.

the consciousness of the emergency justified those responsible for the success of the Expedition in calling upon them to undergo the unceasing labor that was entailed upon them. "Sunday shall be a Sabbath day for them." From the ranks of the troops began to advance, "Push on," was the hoarse cry of the officers, and every one, down to the youngest recruit, was being taken into the leader's confidence regarding the necessity for haste, recognizing the urgency of the case, and put him

We treated our men not as machines as reasoning beings, having all feelings common with ourselves; and they responded to our appeals as British soldiers will when under men in whom they had unbounded confidence.

Before a start could be made it was found that at least two months' supplies of food and clothing would be required for the whole force should be collected at the mouth of the bandwan Lake.

Our transport horses were very fit and had been well fed and had been

The harness had been provided Canadian Government, and, like military stores supplied by it for the duration was of an inferior description.

Canada was to be reduced—in the  
of 1870; and orders had been re-  
the general commanding, desiring  
dispose of, on the spot, or to send  
England—according as he might  
best for the public interest—all the  
stores giving the Dominion Govern-  
option of buying at a valuation all  
portion of them. We had in store  
harness and every description of ar-  
quired for the equipment of the for-  
regulation prices of which were co-

It did not, however suit the Ottawa, whose province it was to obtain required stores, to get them from magazines; they preferred purchasing inferior and dearer articles through their own agents from their own political and supporters. When money is spent in Canada, the opportunity is lost for furthering party objects. A stronger illustration of this, we may mention that the boots supplied

The men for the land transport were especially engaged for this duty, the militia department, and, with exceptions, a more worthless set as soldiers and horse-keepers it is scarcely possible to imagine. Men of all sorts of callings, except those accustomed to the care of

## Canada's Claims.

These claims have been a hotly contested, in advance of the sitting of the Joint High Commission for the settlement of the Alabama claims and other questions pending between Great Britain and the United States, that the interests of Canada were about to be sacrificed, will find the news by telegraph from Washington. The dispatch to which we refer bears an official character. It announces that the Commission will commence its sittings next week, and that the Government of Canada has been notified by the British Government that the claims for compensation for damages caused by the Fenians during their "raids" will be considered. We sympathize with the sender of the telegram, who seems exceedingly disappointed at the prospect. Doubtless, before the Commission concludes its labors, he will find that justice—which is altogether likely not to be overlooked in the matter—is even-handed.

## Public School Act.

The following is a summary of the several clauses of the new School Act so far as it relates to the Public Schools. The bill gives to the Grammar Schools what will be a subsequent clause. The first clause provides that all common schools shall hereafter be known as Public Schools and that they shall be free throughout the province, except in such cities, towns and villages as the School Trustees may desire to make an exception to. The second clause provides that no school shall be established or continued except as provided in the Act. The third clause provides that no school shall be established or continued except as provided in the Act. The fourth clause provides that no school shall be established or continued except as provided in the Act.

By the greatest hilarity and good humor, and a happy and a happy past ten o'clock, the happy joyous after-dinner full expression to the National Association of the City of Belleville in the spirit-stirring strains of Belleville in the best of the best of their respective homes in the best of the best of themselves, and at peace with all mankind.

Belleville, Feb. 23, 1871.

For the Intelligence.

School Exhibition, Canfield.

On Wednesday evening last, we had the pleasure of attending an Exhibition, held in the Brick School House, Canfield, which was, on the occasion, crowded to its utmost capacity. Mr. M. R. Canfield was in the chair, presiding over the proceedings of the evening, which he did in a very satisfactory manner. The evening's entertainment consisted of recitations, Dialogues, Music, &c., in which the scholars of the School acquitted themselves very creditably, reflecting the greatest credit on Mr. Faulkner and Miss Helen McTaggart, their teachers. The music by Miss Laura Nicholson, Miss Bessie Lingham, and Messrs. VanNorman, R. and J. M. W. Wolcott, were heartily applauded. "The stage straggler" was sung by Mr. Paul Larkins. The comic songs by Mr. Harvey Henderson, of the Belleville Dramatic Association, were loudly enjoyed. "The last days of Jerusalem," by Mr. Frederick Sanderson, also, "Clucking Women," by Mr. Wellington Canfield, were well rendered. "The Moral Speakers," by Messrs. E. Brock and D. G. Danziger, was deservedly applauded. In the Dialogue "The Enrolling Officer" and the "Country Court," Miss Helen McTaggart and Miss Edith Nicholson, played their parts admirably well. In the Dialogue, "What becomes of a Loose Tongue," Miss Alice Nicholson and Mr. W. Canfield performed their parts so to merit great credit. "The Gentleman and his Irish Servant" was very well rendered by Mr. James Walsh and Mr. Paul Larkins. The programme being of too great a length, several pieces had to be omitted. The entertainment was very satisfactory to all present, and was closed by singing "God Save the Queen." The amount realized was \$35.

**The Revolution around Paris.**

Whether you take, for three or four miles away from the French frontier, are broken walls, crumbled roofs, and windows and crumbled doors. As for furniture, no such thing as a bed and table, chairs, bedsteads and billiard tables have been burnt by the besiegers for fuel, and when that fuel, form of it was exhausted, the flames, the doors, the shutters, and finally the staves were pulled away and piled up to make a fire. Walls may be left standing, but of no use hang on here and there, at a distance a house may look almost entire; but when you come near you are amazed at the utter demolition of everything but the outside shell. When to an ordinary inexperienced eye there is no more to look, when the very staircase has gone into the fire, then comes the turn of the plates that carry the doors, the frame is knocked off the walls, and the lattice which carried it is torn away to warm the frozen Germans. The vine stakes in the fields, the wooden fences around the gardens, the handles of the peasant's implements—all these were sent into the flames long ago. Clow to Versailles is the superb chateau of La Collette, which belongs to Madame Pecqueur; in Paris, its cellar, its gardens were all destroyed long ago, but the house itself was almost intact, until a bomb from Mont Valerien fell upon it, driving through the library and burning in the drawing room. Of course the house will soon be abandoned by the Prussian officers, and it will be strange indeed if the furniture, almost royal in magnificence, is not rapidly consumed. In the meantime, the chateau will belong to Mr. Howard, and was sold two years ago for \$120,000 by her son, the Comte de Becheret, to the Duchesse de Bauffremont, it is still more completely ruined. All the coaches, the chandeliers, the tapestries which were put on the hillside at Garches, Vincennes, Boulogne and Louveciennes, and Bellevue and Meudon, and a hundred other places, have been utterly destroyed. Malmaison was sent on fire many days ago, and it is now being burnt on the first of the Bois de Boulogne.

BY ATLANTIC CABLE.  
**Morning Despatches.**  
Prussians not to enter Paris.  
French National Assembly.  
Feeling against German Demands.  
German Press on Indemnity.  
The Algeria Arrived.

Paris, Feb. 24th, via London 2:30, 1 a.m.—The military authorities here are still undecided as to the entry of the Prussians into Paris, but the impression is becoming general that the army will forego their triumph.  
The Assembly is circulating that the Assembly, on being informed, will reassemble at Fontainebleau.  
Journals here say the demands made by Germany on France have produced a feeling of gloom in the Cabinet of L. Rouvier, and in St. Petersburg.  
The Versailles Monitor prints a series of extracts from German newspapers, and states that whatever the amount of indemnity may be it is impossible to exceed the good right of Germany or the resources of France.  
Grazzavento, Feb. 23rd—The steamer Algeria, from New York, has arrived.

**American Despatches.**

War between Honduras and San Salvador.  
A Revolution in the latter Country.  
Peace restored in Columbia.  
The English Commissioners in Washington.  
New York, Feb. 23rd—The Herald's special, dated Panama 21st, says: Honduras declared war on San Salvador on the 18th, and by the 20th six hundred troops were within two days march of San Miguel.  
San Salvador is virtually in rebellion against Panama. The revolution and the United States are controlled by the same leaders.  
Peace has been restored in the United States of Columbia.  
The death of Magiera is contradicted.  
Washington, Feb. 24th—The English members of the High Commission visited the State Department, and were introduced by Sir Edward Thornton to Mr. Fish. A preliminary meeting will probably be held on Monday next, but they will not organize regularly for work until the arrival of Sir John A. Macdonald, Sir Stafford Northcote, and Judge Thomas. There seems to be an impression that the sessions and discussions of the commission are to be open, but this is fallacious.

**Afternoon Despatches.**

The Very Latest.  
Despatches To 4 P. M.  
London, Feb. 23rd—A terrible collision occurred today in the South Wales. Fifty first-class have been taken from the train.  
Attorney General's mission to Italy is to reclaim the material left at Rome on the departure of the French army.  
The radicals have again invited Garibaldi to take his seat in the National Assembly.  
A special from Paris to the Times says the French project must be to the object must be the advantage of the Prussian terms. The preliminary have been sent to the conditions and stipulations of the treaty of peace have not yet been agreed upon. The French are endeavoring to obtain the abandonment of certain deterring conditions. The French peace is, however, regarded by Paris as signed.  
The Duke of Broglie presented credentials to the Queen yesterday as ambassador of France. The Daily News has the following from Paris to the Duke: Louis Blanc, Victor Hugo and Henri Rochefort, members of the Radical Left of Assembly, will present to the body a motion demanding the impeachment of Napoleon.  
If this world is a free show, what is the price of admission? But, sorrow, a small tribe of sunshine and a good deal of shadow.

**A New Arithmetic.**

Sick gait (walking into a whiskey shop) Well, I believe I will spend my dime on crackers this morning.  
Baker-keepers hand him crackers, which he takes, but does not pay for.  
"I cannot stand them; give me brandy for the crackers."  
Baker-keeper gives him some brandy.  
He pours it out, smells it, shakes his head. "Don't think I can go that. Give me some whiskey for the brandy."  
Baker-keeper hands him out the whiskey. He turns out a full glass, drinks it down and starts out.  
Baker-keeper—Held on there if you have not paid me for that whiskey?  
Sick gait—"I gave you the brandy for the whiskey, sir."  
"I gave you the crackers for the brandy, sir."  
Well, you ain't paid me for the crackers.  
"Well, you ain't paid me for the brandy yet."  
Baker-keeper end no more.

**FEVER AND AGUE.**  
Notwithstanding the great extent of Malaria, Arterio-  
sclerosis, and Rheumatism's prevalence,  
**AVER'S CURE** for  
Fever and Ague,

CHILLS AND FEVER.  
YES, I HAVE TAKEN IT.

[illegible]

THE BAKERY.

The Home Engineer.

In the heat of the night, as the train dashes  
The sleeper lay dreaming, unconscious of  
The danger that was near, they thought not  
Of death, they heard not the danger's alarm.  
"Blink!" "blink!" shrieked the engine; but  
"Ah!" "Ah!" "Ah!" they cried, and then they  
Saw their eyes closed in death— their torments  
were over.  
The hot, blinding sun was their funeral pyre.  
Perforated through the darkness, the  
land to his eye.  
Stood the engineer, stunned, and his head  
reverted.  
As he saw the signal red, the whistle re-  
sounded.  
With the terrible warning, "Down you  
go, down you go!"  
"We were all asleep for your life, Doctor  
Jung!"  
For you said, "Don't stop!" "Jump down  
you go!"  
"You may jump if you like," says the  
engineer.  
"As for me, I will stand to my post like a  
man!"  
Then the flames closed around him— on his  
prison to his death.  
He had died death as often as he had  
with one hand on the throttle, and one on the  
brake.  
Died under "Don't Stop," the brave  
engineer.  
L. J. JOHNSON.  
New York, 10th, 1911.

Pointe Rouge.

A correspondent of the Cincinnati Gas-  
ette recommends the extensive planting of  
early potatoes, and the abandonment of  
late planting potatoes during the prevalence  
of the potato bug. — On the approach of  
the potato bug, the farmer should dig down  
the potato and bury in the earth  
or eight inches deep, where thousands of  
them may not be found in their winter  
quarters, only waiting for the warm sun  
of June to call them forth to their work  
of destruction. The bugs will make their ap-  
pearance about the 1st of June, but not so  
numerous but that they can be managed  
until an early crop can be matured. When  
they first appear, they immediately fly in  
a search of their favorite food. After a few  
days the roots, and in a day or two the  
leaves are deposited, after which the old  
leaves soon become turgid and die, having  
lost their round of life and died out  
of their little day. In four or five days these  
leaves in their turn are latched, and after  
about ten days of voracious feeding, these  
things that are hatched state to the full  
size of the potato bug larva. They then  
seek the earth and dig down as each un-  
der ground, where in a few days the lar-  
vae change to the beetle, when they come  
forth the complete Colorado potato beetle.  
To perpetuate their species in like man-  
ner as the first, and thus they keep on  
multiplying, one generation after another,  
increasing to such astonishing numbers as  
to eat everything before them. The ap-  
proach of cold in autumn it seems that  
these only burrow in the earth but have  
not yet passed together, while all the rest  
die off. Paris grows will kill them, but  
they keep coming in the spring, and thus  
multiplying so fast that I think it exten-  
sively doubtful whether it will pay to cultivate  
the late varieties of potato at all.

An American editor recently said to his  
correspondent, "If I were a potato, I would  
write you articles."

The American Agriculturist,  
FARM, GARDEN AND HOUSEHOLD,  
Containing a Special Instructional and  
Department for Children and Youth.  
ESTABLISHED IN 1842.

THE AMERICAN AGRICULTURIST is a large periodical of  
the highest quality, and is published weekly.  
It contains a large amount of valuable  
information for the farmer, the gardener,  
the housewife, and the child. It is  
prepared by practical teachers writing from  
the experience of the Farm, the Orchard and  
the Household.

The Department for Children and Youth is prepared  
with special care, to furnish amusement and to in-  
crease the knowledge and intelligence of the  
young. The Department for the Household  
contains a large amount of valuable information  
for the housewife, and is published weekly.
